

Radio Altimeter GRA55 with 5G Filter on AS 350 B3

Description:

This certified modification enables the installation of a Garmin GRA 55 radio altimeter system — including its 5G interference filter — on Airbus H125 (AS350 B3e) rotorcraft.

The system provides **precise AGL altitude** information and generates **aural and visual alerts** when descending below a selected decision height or a fixed 100 ft threshold, enhancing pilot situational awareness during low-level operations and final approach.

Key benefits:

-  The installation kit includes all necessary components and is delivered with **EASA form 1**.
-  Quick installation : Direct interface with Garmin displays ; Optimized mechanical supports and templates make **installation fast and straightforward**.
-  OEM-Recognized : **Officially labeled by Airbus Helicopters** for guaranteed design quality and full compatibility.
-  5G interference protection : The external 5G filter ensures **full compliance with FAA AD 2023-11-07**, lifting all operational restrictions related to 5G interference in U.S. airspace.
